

### How to use this ring size guide:

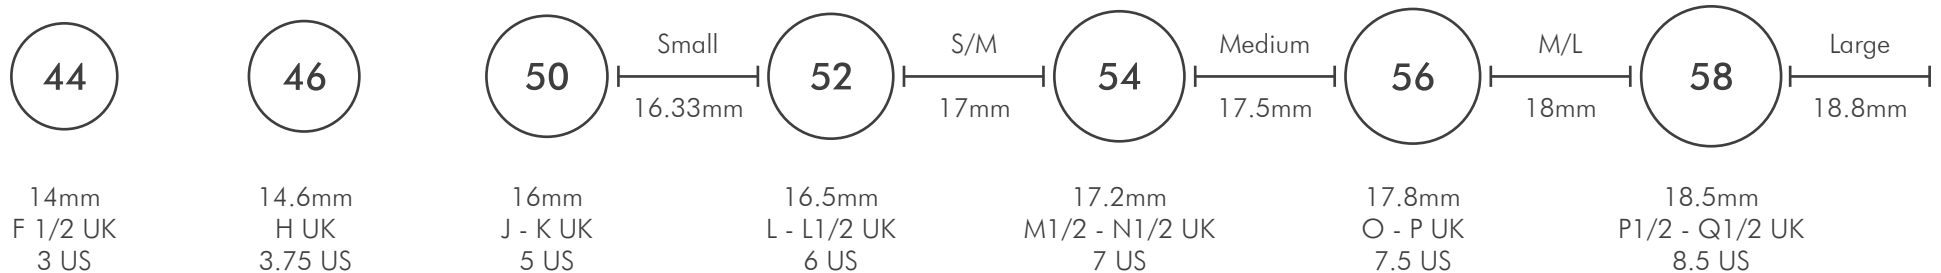

1. **Print out this page on A4 paper at 100% to make sure it's as accurate as possible.**

Confirm the printing accuracy by measuring the line to the right. It should be exactly 85.6mm or the same size as a bank card.

2. **Take a ring from your jewellery box and place it over each of the circles to find the best match.**

Match the inner edge of your ring to the circle that's closest in size.

3. **If you're still not sure, pop into an Oliver Bonas store to try a ring on in person.**
