Vertical height adjustment

CARING FOR YOUR UPHOLSTERED FURNITURE
To ensure that your upholstered furniture is kept in pristine condition use a lint roller to pick up any fluff or marks that have been left. If you do this regularly, your upholstered product will remain in the best condition.

IMPORTANT
Velvet is inherently sensitive to pressure.
Any marks left after scuffing or compression will come out given time, but this process can be helped along by lightly steaming the affected area.
This is a natural characteristic of this type of fine fabric.
It does not in any way, detract from its wearing ability.

NEVER
Use water to clean fabric – use a dry cloth to remove surface moisture.
Always dab the affected area, do NOT rub.

It is always advisable to use a specialist upholstery dry cleaner.
For best results with more stubborn stains, use a reputable specialist dry cleaning service.

Dust the wooden legs with furniture polish and a cloth.
Please be careful not to get polish on the fabric as this may cause staining.

Do not drag your upholstery as it may damage the joints and mark your floor.
Avoid sharp objects. Indoor use only.
